

TO CITY CLERK FOR PLACEMENT ON NEXT  
REGULAR COUNCIL AGENDA TO BE POSTED #53

MOTION

There have been on-going concerns raised over the oil drilling and extraction operations located at 3300-3326 W. Washington Boulevard in Council District 10. On April 7, 2016 the United Neighborhoods Neighborhood Council raised additional concerns over these operations and we need a comprehensive review and public hearing to provide the public an opportunity to voice concerns regarding the ongoing operations at the site.

A report just released by the Petroleum Administrator also finds that the wells were converted from injection to production wells without the proper permits from the Planning department in violation of Municipal Code Section 13.01.

For these reasons, action is needed to initiate Nuisance Revocation proceedings at this site.

I THEREFORE MOVE that the Planning Department be directed to initiate Nuisance Revocation proceedings relative to oil drilling and extraction operations at 3300-3326 W. Washington Boulevard in Council District 10 to enable the public an opportunity to voice concerns regarding the ongoing operations at the site as well as for the City to consider imposing further conditions at this location since the Plan Approval (ZA-1994-16773-PA1) was issued in 2007.
